

XL 660

Digital Keypad

The Summit Access Controls XL 660 is the perfect, low cost keypad designed with the needs of the consumer in mind. Simple, feature rich programming is the XL 660's benchmark.

A stainless steel faceplate and powder coated housing protect the XL-660 from weather and abuse, providing the unit with years of trouble free operation.

Features like 660 code capacity, a versatile 12 to 24 VAC / VDC power requirement, latch code, sleep code, event input, 2 relays, variable relay output time and the 3 strikes you're out security feature make the XL 660 the perfect keypad for most applications.
